# About Us

Green Pillars Ready-mix is set to compete in the highly competitive Ready-Mix Concrete Manufacturing industry and to help bolster construction activity across several sectors due to the increasing demand for industry products not only in the Western Region but throughout the United Arab Emirates.

The standard plant facility situated in Madinat Zayed, Western Region have successfully launched its first operation in early 2021, consisting of our experienced team of engineers and production staff offering cutting-edge technology without compromising the product quality, environment concerns and safety.

## Quality and Services

---

Green Pillars Ready Mix is committed to providing tailored solutions encompassing design, quality control, testing, material logistics, and supply chain management to meet the diverse needs of our customers, irrespective of project volume or scale across different business sectors. Since our establishment, we have not only prioritized the production of high-quality products but have also invested in the most advanced mixing technology in the ready-mix sector. Our reputation for unmatched accuracy and superior consistency underscores our commitment to excellence.

## Accreditations and Compliance

---

We take pride in our accreditation to ISO 9001:2015, ISO 14001:2015, and OSHAS 18001 standards, as well as our membership in the National Ready Mixed Concrete Association (NRMCA), demonstrating our commitment to professionalism and excellence in service delivery. Within a short span of time, we have obtained approvals from various local authorities and clients, reflecting our dedication to customer satisfaction. Additionally, Green Pillars Ready Mix adheres to UAE government policies regarding "Green Durable Concrete" and "Green Building" requirements

# Product Standards

---

Our concrete is produced in accordance with international and national standards, including **BS, ASTM, ACI, DIN, and EN**, ensuring uncompromising quality and reliability. We prioritize the maintenance of our fleet to meet production targets and the needs of our clients, thereby maintaining their trust. Under the supervision of our qualified engineers, our truck mixers undergo daily check-ups and weekly maintenance programs to mitigate the effects of climatic changes on cement quality.

Green Pillars Ready Mix prides itself on offering a comprehensive service that begins with the Design Phase and extends seamlessly through to the Hand Over Phase, providing a cost-effective and competitive alternative that ensures complete owner satisfaction from inception to installation and beyond. Our commitment to delivering tailored solutions encompasses a precise mix of design expertise, stringent quality control measures, rigorous testing protocols, efficient material logistics, and a robust supply chain management system, tailored to meet the unique requirements of our diverse clientele, regardless of project volume or scale across various business sectors.

We offer a wide range of ready-mix concrete classes to suit the specific needs of each project, including but not limited to: Durable Concrete, Pre-Stressed Concrete, Self-Compacted Concrete, Grout Concrete, Screed Concrete. For optimal performance, our consultants may incorporate various mineral admixtures such as GGBS, Micro Silica, Fly Ash, and other materials as required for each project. Quality Assurance: At Green Pillars Ready Mix, we prioritize the meticulous evaluation of materials for their chemical and physical properties, including sulfate and chloride content, grading line tests, silt con-tent, elongation, flakiness, and specific gravity.

## Our Mission

---

To exceed client expectations by consistently delivering superior products on time, tailored to project requirements, and accompanied by professional customer service. Our team of experienced professionals goes the extra mile to produce quality products while upholding safety and environmental standards. We are driven by a deep-seated motivation to help our customers' success, ensuring total satisfaction in completing their projects.

At Green pillars ready-mix, our accomplishment lies in the success of our customers.

## Our Vision

---

To establish ourselves as the foremost and trusted supplier of ready-mix concrete in the UAE, recognized for delivering quality products and leveraging cutting-edge technology. We are dedicated to continuously expanding our knowledge and technical expertise to better serve our clients and uphold the highest standards of excellence in Quality System and Mixing Technology. Our goal is to set a benchmark for service excellence in the UAE construction industry, earning a reputation among contractors as a reliable supplier that consistently fulfils its commitments.

## Our Core Values

---

**Excellence:** We are committed to offering only the best by harnessing the latest technology to consistently deliver superior products and services

**Reliability:** We pledge to deliver on time, regardless of location, ensuring that even the most remote areas receive our prompt and dependable service.

**Continues Improvement:** We continuously strive for improvement, producing high-quality products while adhering to stringent safety and environmental standards.

**Professionalism:** We offer professional services with a dedicated focus on customer satisfaction and retention, building lasting relationships based on trust and reliability.

# Facilities And Capabilities

At Green Pillars Ready Mix, we take pride in our state-of-the-art facilities equipped with cutting-edge technology aimed at enhancing concrete mixing capacity and improving energy efficiency. Our commitment to innovation ensures that we remain at the forefront of the industry, delivering superior products and services to our clients.

## Plant Specifications:

Fixed 120m<sup>3</sup>/Hr GPE Plant  
Fixed 90m<sup>3</sup>/Hr GPE Plant  
Fixed/Mobile 80m<sup>3</sup>/Hr ELBA Plant

Our GPE PLANT 120 batching plants represent the latest iteration of the horizontal pattern of concrete mixing, ensuring efficiency and precision in every batch. With two batching plants boasting an output capacity of 120m<sup>3</sup>/Hr each, we guarantee prompt and reliable service to meet our clients' demands.

Additionally, each of our plants is equipped with Litronic FMS moisture sensors for two types of sands. These sensors, based on capacitive measuring principles with an integral microprocessor, provide real-time moisture readings (more than 50 readings/second) and value computing. Housed in stainless steel with a high-strength ceramic shield and temperature compensation, these sensors guarantee accuracy and reliability in our batching processes.

At Green Pillars Ready Mix, we are committed to maintaining the highest standards of quality and efficiency, utilizing cutting-edge technology and equipment to deliver superior products and services to our valued clients.

Fully Automatic Lampert 1 Mobile Batching Plant with a capacity of 40m<sup>3</sup>/Hr, featuring software upgraded by GPE

Our plants feature 5 compartments, each with a capacity of 35 m<sup>3</sup>, for aggregate storage, inline silo for storing Cement, GGBS, Micro Silica, Fly Ash, and other essential materials. Pneumatic discharge gates with coarse and fine aggregate dispersal ensure precise batching control.

KTI Chiller Model Flip 7-42: This chiller boasts a remarkable ice production capacity of 42 tons per day, with an ice storage capacity of 23 tons. Additionally, it produces 176m<sup>3</sup> of chilled water per day, with a storage capacity of 58m<sup>3</sup>.

Conveyors equipped with appropriate protection mechanisms prevent excessive wear, ensuring the longevity of our equipment.

# Products

---

## General Mixes

### Regular Concrete

This is the most common type of concrete and is used for general construction purposes. It typically has a compressive strength ranging from 20 to 40 MPa (megapascals).

### High Strenght Concrete

This type of concrete is designed to have higher compressive strength than normal strength concrete, typically ranging from 45 MPa to 80 MPa or even higher. It is used in high-rise buildings, bridges, and other structures where higher strength is required.

### Screed & Mortar

Screed mixes are commonly used for leveling the top surface, may contain coarse and fine aggregate or only fine aggregate depending on the thickness and requirement.

## Special Concrete

### Shotcrete / Gunitite

Shotcrete is a mix of cement, aggregates, and water sprayed onto a surface under high pressure. It is commonly used for repairing or reinforcing walls and structures, especially in difficult-to-reach areas.

### Self Compacting Concrete (SCC)

SCC is highly flowable and can spread and consolidate under its own weight without vibration. It is used in congested reinforcement areas where traditional consolidation methods are impractical.

### Lightweight Concrete

Lightweight concrete has two types, structural and non-structural.

Structural is made using lightweight natural aggregates (such as perlite or pumice) while Non-structural is made of lightweight aggregates (foam and EPS beads). It has a lower density and thermal conductivity compared to normal weight concrete, making it suitable for reducing the overall weight of structures.

## **Waterproofing Concrete**

Waterproofing concrete is essential for maintaining the integrity and longevity of concrete structures. By choosing the appropriate waterproofing method and ensuring proper application and maintenance, you can effectively protect concrete against water damage and ensure long-term durability.

## **Durable / Green Concrete**

Durable / Green concrete refers to concrete that is designed and constructed to withstand various environmental conditions, physical stresses, and chemical exposures over its intended service life. Achieving durable concrete involves careful consideration of mix design, construction practices, and maintenance strategies.

## **Dry Mix Concrete**

Dry mix concrete, also known as dry batch concrete or dry mix mortar, refers to a specific type of concrete or mortar that is premixed in a dry form in a factory or batching plant, and then transported to the construction site for mixing with water and final application.

## **Fibre Concrete**

Fiber concrete, also known as fibrous concrete or fiber-reinforced concrete (FRC), is a type of concrete that contains fibrous materials as reinforcement. These fibers are distributed throughout the concrete mix to enhance its properties and performance.

## **Temperature Control Concrete**

Temperature control in concrete refers to managing the temperature of concrete during mixing, pouring, curing, and early-age hydration stages to ensure optimal performance and durability of the finished structure.

## **Jumbo Bag Concrete**

Jumbo bag concrete is delivered and stored in large flexible containers, typically made of polypropylene or similar materials. These bags are commonly used in construction and landscaping for convenience and ease of handling.

## QUALITY POLICY

GREEN PILLARS READYMIX AND DRYMIX CONCRETE AND MORTARS MANUFACTURING - L.L.C - O.P.C, we are committed to delivering the highest quality ready-mix concrete to meet and exceed our customers' expectations by implementing on ISO9001 compliant Quality management System. We strive to ensure that our products and services adhere to the highest standards of quality, safety, and sustainability. Our commitment to continuous improvement and customer satisfaction is fundamental to our operations.

This is achieved by:

Complying with statutory obligations, standards, specifications and codes of practice relevant to our business and industry

Continuously monitor and evaluate our processes to ensure consistent product quality

Engaging suitably qualified, skilled and experienced people

Educating and training our people to continually improve their skills awareness and knowledge of our management system, including project processes best practice

Continually improving processes and practice by promoting a culture of quality awareness throughout the organization.

## QUALITY OBJECTIVES

Customer Satisfaction - 100% on-time Production and Delivery of products.

Product Quality - Achieve maximum compliance with specifications for all batches. produced and reduce the number of customer complaints related to product quality.

Employee Training and Development - Ensure 100% of employees receive training on quality standards and practices.

Process Improvement - Implement audits to identify areas for improvement.

Sustainability and Compliance - Implement eco-friendly practices to reduce the carbon footprint and ensure compliance with local and national environmental regulations related to concrete production.

## OCCUPATIONAL HEALTH AND SAFETY POLICY

GREEN PILLARS READYMIX AND DRYMIX CONCRETE AND MORTARS MANUFACTURING - L.L.C - O .P. C is committed to providing a safe, healthy, and environmentally responsible workplace for all employees, subcontractors, suppliers, and stakeholders. Safety is a core value, not just a priority, as values remain constant. We will adhere to all applicable federal laws, regulations, and industry standards to ensure the health, safety, well-being of our workforce and minimize environmental impacts. This policy applies to all GPRM activities, covering all employees, subcontractors, suppliers, and related stakeholders. The General Manager holds the ultimate responsibility for ensuring Health, Safety, and Environmental (HSE) matters are treated with the same importance as other business objectives. However, every individual within the organization is accountable for adhering to this policy.

We are committed to:

Proactively identify unsafe conditions and practices to mitigate hazards before they result in harm.

Ensure clear and timely communication of HSE alerts, updates, and policies at all organizational levels.

Prevent workplace injuries, occupational illnesses, and environmental damage through continuous improvement of safety protocols.

Operate in accordance with recognized international best practices and standards for safety, health, and environmental management.

Comply with all relevant legal, regulatory, and contractual obligations to ensure safety and environmental protection .

Establish, monitor, and periodically review HSE objectives to ensure continuous alignment with organizational SM-002 goals .

Provide all employees and stakeholders with relevant training and information, ensuring competency in HSE practices. Regular refresher courses will be offered to reinforce our safety culture.

Preserve natural resources through responsible energy use, waste reduction, and sustainable environmental objectives.

Regularly review and assess our HSE performance to drive continuous improvement and ensure compliance with established objectives .

While management is responsible for the successful implementation of this policy, every individual-regardless of their role or position-is expected to fully adhere to the guidelines and requirements outlined in this policy. GPRM is committed to providing the necessary resources and support to ensure the health, safety, and environmental protecting of all.

## ENVIRONMENT AND SUSTAINABILITY POLICY

Green Pillars Ready mix and Dry mix Concrete and Mortars Manufacturing - Sole Proprietorship LLC is a supplier of Ready mix and Dry mix concrete are fully committed to continual improvement to enhance our environmental performance, through constant review, in order to provide an effectively controlled environmental management system and services, the protection of the environment is one of our major corporate responsibilities; It is a guiding principles in the operation of our business, and key component in the measurements of our business performance.

Top management and staff have responsibilities for the implementation of the policy and must ensure that environmental issues are given adequate consideration in the planning and day-to-day supervision of all the work. All employees and subcontractors are exposed to co-operate and assist in the implementations of this policy, whilst ensuring that their own work, so far as reasonably practicable, is carried out without risk to themselves, others or the environment.

Our Environmental Management System (EMS) Includes:

Strive to continuously improve the way we conduct business with the objective of performing work while minimizing the impact on the environment and ensuring compliance with the contract requirements environmental laws and regulations.

Effectively manage the use of hazardous materials and products, and ensure that effective measures are in place to protect human health and the environment when such materials must be used stored and disposed off.

Maintain of an effective environment management system in line with the requirements of ISO 14001:2015.

Promote environmental awareness amongst our suppliers, contractors and partners by the implementation of operational procedures.

Develop and maintain appropriate emergency and spill response programs.

Promote reduction, reuse and recycling in all of our activities.

Promote efficient use of materials and resources and resources throughout our construction jobsites including water, electricity, raw materials and other resources.

Commit to restoration and rehabilitation of all temporary construction areas.

Protect wetlands, streams, rivers, lakes and coastal waters, trees vegetation, steel slopes and highly erodible soils. ISM 003

Integrate the consideration of environment concerns and impacts into our decision making and activities.

GPR management will periodically review our policies to ensure our EMS processes are effectively established, implemented, and maintained. We will conduct regular internal audits and reviews to facilitate continuous improvement of our processes and performance.
